

DELIVER ON-TIME TO STORES AND CUSTOMERS

GET COMPLETE VISIBILITY, SIMPLIFY LOGISTICS AND
DELIVER YOUR FINISHED PRODUCTS ON-TIME AT SCALE

Delivery time windows are shrinking by the year and consumers are now used to fast deliveries and **real time communication of ETA.**

LogiNext for CPG and D2C brands is a comprehensive delivery management solution- right from easy integration with existing IT systems to generating trip plans through route optimization and **communicating precise ETAs to the end customers.**

LogiNext makes it easy for you to deliver in your own voice through custom tracking links and get a single screen view of operations all of which snowballs into achieving business goals.

“

*LogiNext's works like a charm!
The cloud based platform lets us
deliver on time and track
everything via an easy to use app*

**ANUJ RAKYAN
CO-FOUNDER**

”

BENEFITS

- Auto-allocate orders and generate DRS through efficient and **easy route optimization and trip planning**
- Go-live at the click of a button through an extensive API library which **seamlessly integrates with your existing IT systems**
- **Keep the end customer updated** about order delivery ETA at all times with geofence and timefence based alerts & notifications

TECHNICAL FEATURES AND CAPABILITIES

Capacity Utilization

Make the best of available resources with optimizing for loading of goods on a vehicle and also utilizing fleet capacity in the best possible manner

Reverse logistics

Automatically allocate reverse delivery orders to be picked from stores and warehouses during the time of delivery of goods from distribution centers.

Easy Order Scanning

Reduce manual labor and accurately inscan and outscan orders including single scan for bulk orders

Automated Customer Invoicing

Eliminate the hassle of manually accounting for extra distance traveled or extra trips made; let the LogiNext Pay™ module take care of all the invoicing related requirements.

Live Tracking™

Live Screen is the single pane view for all logistical operations with real time visibility.

Smart Route™

Advanced route optimization for efficient trip planning which is great for the business and the environment.

LogiNext's platform for CPG allows brands to easily integrate with existing systems and go live in a matter of a few clicks. The highly configurable platform is the perfect solution for CPG brands to automate delivery management and deliver the best in class customer experience.
