LogiNext allows us to significantly strengthen our ability to scale and handle millions of orders. It brings a real benefit to the company in terms of profitability and allows us to effectively build a competitive advantage

> **KRYSTIAN KWIATKOWSKI GLOBAL FRANCHISE DIRECTOR**

Consumers are now used to quick contactless deliveries with flexibility in terms of delivery windows. Delivery drivers also need the best app to help them deliver with more efficiency.

LogiNext for F&B is an end to end platform to take care of all delivery automation needs- right from easy integration with existing IT systems to generating trip plans through route optimization and communicating precise ETAs to the end customers.

LogiNext makes it easy for your operations team to get a single screen view of ops along with real time tracking of deliveries to achieve business SLAs.

 Auto-allocate orders and generate DRS through efficient and easy route optimization and trip planning

 Crowdsource deliveries and manage multiple fleets through the Carrier integrations marketplace

- Go-live at the click of a button through an extensive API library which seamlessly integrates with your existing IT systems
- Keep the end customer updated about order delivery ETA at all times with geofence and timefence based alerts & notifications

TECHNICAL FEATURES AND CAPABILITIES –

Smart Route[™]

Advanced route optimization for efficient trip planning which is great for the business and the environment. Reduced distance traveled per delivery translates into quicker deliveries and also less fuel usage which reduces GHG emissions along with delivery costs.

Bulk pickup and deliveries

Getting a custom delivery done at the same place? Bulk pickup (multiple items) and deliveries can be convenient for the driver to deliver the product with just a single sign from the warehouse manager or the place of delivery.

Smart ETA™

Factor in time of wait time, transit location holidays, route conditions to show a precise delivery time to the end customer at the time of placing an order

Hotspots

Get the maximum number of orders delivered from your limited resources by assigning drivers to areas where demand is more and driver supply is less.

Tracking Links

Trigger delivery time communication links to the end customer in your custom branding

LogiNext's end-to-end platform with highly configurable features and a plug&play nature owing to the easy API integrations make it the preferred choice for enterprise brands looking to digitize, optimize and automate delivery management along with delivering a great customer experience.
