Deliver Smart.
Deliver Fast.

DELIVER ON-TIME, EVERYTIME

ORCHESTRATE RETAIL AND ECOMMERCE DELIVERIES FOR QUICK DELIVERIES AT SCALE

Be it apparel, furniture, electronics or any other product, customers expect on-demand deliveries with easy options for returns.

LogiNext simplifies all aspects of order management and plans for deliveries in the most efficient manner to **reduce delivery costs and improve customer experience.**

Capabilities like easy API integrations, route optimization, automatic trip planning, delivery driver management, custom tracking URLs and a detailed analytics dashboard make it possible for D2C brands to win the retail and eCommerce game.

> *LogiNext's Transportation Automation Platform gives us complete visibility and tracking capability over the supply chain to drive meaningful business results*

DECATHLON

BENEFITS

- Efficiently manage ondemand deliveries by collecting orders via APIs or excel uploads and **automatically assigning them onto trips**

- **Reduce delivery costs** by using advanced route optimization technology which also helps in reducing the carbon footprint

- Collect returns easily with complete visibility through **LogiNext Reverse™**

- Assign orders to the right carriers by easily **integrating multiple carriers** onto the LogiNext platform

TECHNICAL FEATURES AND CAPABILITIES

Easy Carrier Management
Integrate with hundreds of carriers via APIs at the click of a button.

LogiNext Smart Route™
Get the power of the best route planning software to boost your delivery management.

ePOD and eSigns
Check and authenticate all deliveries at the point of exchange with secure ePODs and eSigns, along with live customer feedback.

Automate Pickup and Deliveries
Be it picking up goods from the warehouse or last mile deliveries to customers' homes, plan and automate using the best logistics management software.

Live Tracking™
Track the status updates on orders, drivers & trips on a single map in real-time along with auto allocation of orders and controlling routes and drivers in real time

Reverse Logistics:
Setup your processes for easy collection of return orders and cash management

LogiNext's end to end platform with inbuilt Reverse module is the perfect solution for retail firms and eCommerce companies looking to optimize and automate delivery management to give a great end customer experience.
