ONE STOP PLATFORM
FOR THE LONG HAUL

SIMPLIFY LOGISTICS AND TRANSPORTATION MANAGEMENT WITH A COMPREHENSIVE REAL TIME VISIBILITY PLATFORM

Supply chain disruptions, driver shortages and lack of visibility over operations have been challenges for the logistics and transportation industry.

LogiNext's real time visibility platform is a game changer that automates shipment assignments (optimizing resource utilization) with end to end GPS vehicle tracking to increase supply chain efficiency and decrease On-Time, in Full (OTIF) penalties.

> **LARGE NORTH AMERICAN TRUCKING FIRM**

BENEFITS

- **Real time visibility** over overall logistics operations from a single map based visualization
- Enhanced planning and simplified **fleet tracking** with the real time tracking capabilities
- Easy carrier management by API led integrations through the **carrier integration marketplace**

TECHNICAL FEATURES AND CAPABILITIES

Real Time Tracking

Live Screen is the single pane view for all logistical operations with real time visibility.

ETA notifications

Advanced notifications to warehouse to reduce detention time

Customer Invoicing

Manage contracts and invoicing of carriers on the digital platform reducing the chances of human error

Decrease loading/unloading time

Better visibility and configurables rules allows for efficient operations

Capacity Utilization

Make the best of available resources with optimizing for loading of goods on a vehicle and also utilizing fleet capacity in the best possible manner

Bulk scanning

Easily scan all packages with our bulk scanning capabilities

Tackle Driver Shortages

Plan trips efficiently to utilize resources better and do more with less

Analytics Dashboard

Comprehensive KPI reports with actionable insights on a single screen control tower

LogiNext's end to end real time visibility platform is the platform of choice owing to its extensive API marketplace, high levels of configurability, security standards, scalability and the ease of use.
